Computer Science undergraduate with hands-on experience in software development, data analytics, and AI-driven applications.
Skilled in Java, JavaScript, backend integration, APIs, and collaborative development. Built real-world projects and completed internships involving databases, data analysis, and real-world problem solving. Seeking entry-level software development roles. Java Developer internship role.

PROFESSIONAL SKILLS

- **Programming Languages:** Java, JavaScript
- **Core Concepts:** Object-Oriented Programming, Data Structures, Algorithms
- **Web & Backend:** HTML, CSS, React, Firebase, REST APIs
- **Databases:** MySQL, Firebase Firestore
- **Data & ML Tools:** Pandas, Scikit-learn, Data Preprocessing, Model Evaluation
- **Tools:** Git, GitHub, VS Code, Power BI

SOFT SKILLS

- Problem-Solving
- Project Management
- Leadership
- Team Collaboration

WORK EXPERIENCE

AI/ML Virtual Internship – Team Leader (IBM) **July - August 2024**

- Led a team of 4 to design and deliver a production-ready chatbot application using REST APIs.
- Designed modular application workflows following object-oriented programming (OOP) principles for scalability and maintainability.
- Integrated NLP-based request processing with backend services to automate customer query handling.
- Collaborated on requirement analysis, unit testing, debugging, and performance optimisation across development cycles.
- Supported handling of multiple concurrent user queries through automated backend workflows.
- Documented system architecture, API flow, and deployment processes to ensure long-term maintainability.
- Applied standard software development practices to improve code quality and reliability.

Decoding Data – Project-Based Learning Program **July - August 2025**

- Completed a hands-on, project-based program focused on data analytics using real-world datasets.
- Performed data preprocessing, analysis, and visualization using Python, Pandas, and Excel.
- Collaborated with mentors and peers to interpret data, solve analytical problems, and present insights effectively.

PROJECTS / HACKATHONS

Notes Management System

- Developed a CRUD-based notes management application to create, organize, update, and retrieve notes.
- Implemented search, categorization, and filtering features to improve usability and data access.
- Built the application using HTML, CSS, JavaScript, PHP, and MySQL with backend database integration.

Prabal 2025 Hackathon – Team 'Vanguards' | July – August 2025

- Collaborated in a team to ideate, develop, and present a functional project during a 3-day hackathon.
- Engaged in rapid prototyping, coding, and solution design under strict time constraints.
- Incorporated mentorship feedback from industry experts to refine the solution and final presentation.

GitMatch — Developer Collaboration Platform (Ongoing Project)

- Developing a platform to help developers discover and connect with suitable teammates for projects.
- Implementing user matching, skill assessment during onboarding, and project-based discovery features.
- Working on backend logic, APIs, authentication, and database integration for scalable workflows.

EDUCATION

New English School, Satara Graduation Year - 2020
(SSC)

LBS College, Satara Graduation Year - 2022
(HSC)

Dnyanshree Institute of Engineering and Technology Expected Graduation - 2026
(DBATU UNIVERSITY)

CERTIFICATIONS & TRAINING

- **AWS Academy Graduate – Data Engineering**
- **Eduskills Full Stack Java Certification**
- **Google & Eduskills AI/ML Virtual Internship**
- **Prompt Engineering Winter Certification – CSRBOX**
- **Forage – AWS Solutions Architecture Simulation**
- **Forage – Data Vsualisation by Tata**

LANGUAGES

- **English | Professional Level**
- **Japanese | Beginner**
- **German | Beginner**
- **Hindi | Native**
- **Marathi | Native**
